

NOTICE OF DEMOLITION WORK AT PKCT

Port Kembla Coal Terminal will conduct the demolition of one reclaimer machine located at the southern end of the site on Thursday 29 June 2017.

The planned demolition of the reclaimer structure will be via an explosive charge. One instantaneous bang will be heard once the explosive charge is initiated. When the charges are activated the reclaimer will fall over in a controlled manner.

Safework NSW has granted permits for this activity and all works will be conducted in-line with detailed management plans. The Environmental Protection Authority and NSW Department of Planning have been informed of this activity.

There will be a 500m exclusion zone on site on 29 June 2017. The exclusion zone will be put in place in conjunction with NSW Ports.

There will be no public access to Seawall Road, breakwater and adjacent waterways within the exclusion zone.

The water-side exclusion zone will be put in place through the Port Authority of NSW and the Harbour Master for Port Kembla.

We apologise for any disruption, which may be caused. If you require more information please contact PKCT.
