MONTHLY REPORT: COMMENTARY ON RESULTS																				
Note 1: there are no EPL air quality limits in the EPL for industrial monitoring sites. Historical information provides baseline data and assessment criteria has been adopted to assess against actual results to facilitate performance improvement.																				
SAMPLE PERIOD	Date Sampled	Date Results Obtained	Date Published	COMMENTARY ON RESULTS																
January 2023	9/10/2023	28/02/2023	28/02/2023	P3 results high due to outliers from 21-11-22 extreme wind event. SW winds exceeding 30 km/hr. SW winds unlikely to project coal dust towards P3 sensor																
February 2023	9/03/2023	23/03/2023	24/03/2023	P3 results high due to location adjacent to AIE construction site.																
March 2023	6/04/2023	27/04/2023	28/04/2023	P3 results high due to location adjacent to AIE construction site.																
April 2023	5/05/2023	22/05/2023	22/05/2023	P3 monthly results are low, however 12 month rolling average remains above assessment criteria due to elevated results in June 2022. June 22 analysis showed that only small proportion of dust was coal.																
May 2023	5/06/2023	23/06/2023	23/06/2023	P3 results high due to location adjacent to AIE construction site. 70% of sample confirmed to be impurities other than coal.																
June 2023	7/07/2023	21/07/2023	25/07/2023	All results within assessment criteria																
July 2023	7/08/2023	28/08/2023	28/08/2023	P3 slightly outside 12 month rolling average criteria. Analysis identified that > 70% of sample is non-coal dust. Elevated dust at this location due to localised construction on adjacent property																
August 2023	7/09/2023	26/09/2023	26/09/2023	P3 slightly outside 12 month rolling average criteria.																
September 2023	9/10/2023	30/10/2023	30/10/2023	P3 slightly outside 12 month rolling average criteria.																
October 2023	7/11/2023	29/11/2023	30/11/2023	P3 slightly outside 12 month rolling average criteria.

MONTHLY REPORT: COMMENTARY ON RESULTS																				
Note 1: Assessment criteria is based on an EPA guideline of annual average of 4 grams per square metre per month for residential areas. PKCT has adopted a level of 2 grams per square metre for combustible matter for assessment purposes.																				
SAMPLE PERIOD		Date Sampled	Date Results Obtained		Date Published		COMMENTARY													
January 2023		9/01/2023	28/02/2023		28/02/2023		All sites within assessment criteria except R3 at 2.7 (12 month average). Site "R3" had very high levels (95%) of polysaccharide slime and vegetation matter causing the higher than normal measurement in the gauge, there have been several (5) similar results across the 12 month period causing the average to be high. Polysaccharide slime is associated with organic matter.													
February 2023		9/03/2023	23/03/2023		24/03/2023		All sites within assessment criteria

NB TSS (total suspended solids) - under EPL, a TSS water quality limit of 50mg/litre pertains. Exceedance of this limit is permitted when discharge occurs solely as a result of rainfall measured at the premises. For discharge to be considered to occur solely as a result of rainfall, the rainfall must exceed a 5 day rainfall depth value of 90 mm over a consecutive 5 day period.

NB TSS (total suspended solids) - under EPL, a TSS water quality limit of 50mg/litre pertains. Exceedance of this limit is permitted when discharge occurs solely as a result of rainfall measured at the premises. For discharge to be considered to occur solely as a result of rainfall, the rainfall must exceed a 5 day rainfall depth value of 90 mm over a consecutive 5 day period.

NB TSS (total suspended solids) - under EPL, a TSS water quality limit of 50mg/litre pertains. Exceedance of this limit is permitted when discharge occurs solely as a result of rainfall measured at the premises. For discharge to be considered to occur solely as a result of rainfall, the rainfall must exceed a 5 day rainfall depth value of 90 mm over a consecutive 5 day period.

2023 PKCT Sedimentation Pond Overflows - EPL 1625							
Ponds location/names: TS1 pond: DP22, Central Pond: DP23, Tower 3 pond: DP24, South Pond: DP25, Workshop Pond DP26, Berth 102 DP27.							
Sample Location	Sample Date	Date Results Obtained	Date Results Published	pH (pH units) Criteria: Monitoring only	Total Suspended Solids (milligrams per litre) Criteria: Monitoring only	Oil/ Grease (milligrams per litre) Criteria: Monitoring only	Commentary on Results
No overflows from any satellite ponds in January 2023							
DP26 - Workshop Pond	9/02/2023	23/03/2023	24/03/2023	6.65	<5	not visible	Overflow of Workshop Pond occurred after a heavy rain period (27.2mm) in an hour leading up to the overflow. Pond sediment levels were below the required 20% and no pump failures occurred. Pond and pump capacity could not keep up with the inflows. Discharge is permitted under PKCT's licence conditions.
DP22 - TS1 Pond	9/02/2023	23/03/2023	24/03/2023	7.29	114	not visible	Overflow of TS1 Pond occurred after a heavy rain period (27.2mm) in an hour leading up to the overflow. Pond sediment levels were below the required 20% and no pump failures occurred. Pond and pump capacity could not keep up with the inflows. Discharge is permitted under PKCT's licence conditions.
DP26 - Workshop Pond	14/03/2023	27/04/2023	28/04/2023	6.71	35	not visible	Overflow of Workshop Pond occurred after a heavy rain period (35.6mm) in an hour leading up to the overflow. Pond sediment levels were below the required 20% and no pump failures occurred. Pond and pump capacity could not keep up with the inflows. Discharge is permitted under PKCT's licence conditions.
No overflows from any satellite ponds in April 2023							
No overflows from any satellite ponds in May 2023							
No overflows from any satellite ponds in June 2023							
No overflows from any satellite ponds in July 2023							
No overflows from any satellite ponds in August 2023							
No overflows from any satellite ponds in September 2023							
No overflows from any satellite ponds in October 2023
