MONTHLY REPORT: COMMENTARY ON RESULTS																				
Note 1: there are no EPL air quality limits in the EPL for industrial monitoring sites. Historical information provides baseline data and assessment criteria has been adopted to assess against actual results to facilitate performance improvement.																				
SAMPLE PERIOD	Date Sampled	Date Results Obtained	Date Published	COMMENTARY ON RESULTS																
January 2025	5/02/2025	25/02/2025	25/02/2025	P3 results high due to outliers from multiple extreme westerly wind events in July and August 2024. Winds exceeding 90 km/hr. Breakdown of fines suggest dominant dust source is not from PKCT. January results have reduced significantly.																
February 2025	4/03/2025	27/03/2025	28/03/2025	P3 results high due to outliers from multiple extreme westerly wind events in July and August 2024. Winds exceeding 90 km/hr. Breakdown of fines suggest dominant dust source is not from PKCT. February results have remain low.																
March 2025	4/04/2025	22/04/2025	30/04/2025	P3 results high due to outliers from multiple extreme westerly wind events in July and August 2024. Winds exceeding 90 km/hr. Breakdown of fines suggest dominant dust source was not from PKCT. March results were not able to be obtained due to a broken bottle caused by heavy seas.																
April 2025	5/05/2025	22/05/2025	22/05/2025	All sites within assessment criteria. Unable to access site "P3" due to land holder identification of asbestos near deposition gauge.																
May 2025	5/06/2025	25/06/2025	26/06/2025	All sites within assessment criteria. Unable to access site "P3" due to land holder identification of asbestos near deposition gauge.

NB TSS (total suspended solids) - under EPL, a TSS water quality limit of 50mg/litre pertains. Exceedance of this limit is permitted when discharge occurs solely as a result of rainfall measured at the premises. For discharge to be considered to occur solely as a result of rainfall, the rainfall must exceed a 5 day rainfall depth value of 90 mm over a consecutive 5 day period.
