MONTHLY REPORT: COMMENTARY ON RESULTS																					
Note 1: there are no EPL air quality limits in the EPL for industrial monitoring sites. Historical information provides baseline data and assessment criteria has been adopted to assess against actual results to facilitate performance improvement.																					
SAMPLE PERIOD	Date Sampled	Date Results Obtained	Date Published	COMMENTARY ON RESULTS																	
January 2025	05/02/2025	25/02/2025	25/02/2025	P3 results high due to outliers from multiple extreme westerly wind events in July and August 2024. Winds exceeding 90 km/hr. Breakdown of fines suggest dominant dust source is not from PKCT. January results have reduced significantly.																	
February 2025	04/03/2025	27/03/2025	28/03/2025	P3 results high due to outliers from multiple extreme westerly wind events in July and August 2024. Winds exceeding 90 km/hr. Breakdown of fines suggest dominant dust source is not from PKCT. February results have remain low.																	
March 2025	04/04/2025	22/04/2025	30/04/2025	P3 results high due to outliers from multiple extreme westerly wind events in July and August 2024. Winds exceeding 90 km/hr. Breakdown of fines suggest dominant dust source was not from PKCT. March results were not able to be obtained due to a broken bottle caused by heavy seas.																	
April 2025	05/05/2025	22/05/2025	22/05/2025	All sites within assessment criteria. Unable to access site "P3" due to land holder identification of asbestos near deposition gauge.																	
May 2025	05/06/2025	25/06/2025	26/06/2025	All sites within assessment criteria. Unable to access site "P3" due to land holder identification of asbestos near deposition gauge.																	
June 2025	04/07/2025	19/07/2025	21/07/2025	All sites within assessment criteria. Unable to access site "P3" due to land holder identification of asbestos near deposition gauge.																	
July 2025	05/08/2025	21/08/2025	21/08/2025	All sites within assessment criteria. Unable to access site "P3" due to land holder identification of asbestos near deposition gauge.																	
August 2025	04/09/2025	23/09/2025	23/09/2026	All sites within assessment criteria. Unable to access site "P3" due to land holder identification of asbestos near deposition gauge.																	
September 2025	3/10/2025	20/10/2025	25/10/2025	All sites within assessment criteria. Unable to access site "P3" due to land holder identification of asbestos near deposition gauge.

MONTHLY REPORT: COMMENTARY ON RESULTS																				
Note 1: Assessment criteria is based on an EPA guideline of annual average of 4 grams per square metre per month for residential areas. PKCT has adopted a level of 2 grams per square metre for combustible matter for assessment purposes.																				
Note 2: With regard to the data reported and consideration of PKCT's contribution to dust emissions, it is noted that ambient air quality is impacted on by numerous dust sources industrial and otherwise within and beyond the Wollongong region and influenced by

NB TSS (total suspended solids) - under EPL, a TSS water quality limit of 50mg/litre pertains. Exceedance of this limit is permitted when discharge occurs solely as a result of rainfall measured at the premises. For discharge to be considered to occur solely as a result of rainfall, the rainfall must exceed a 5 day rainfall depth value of 90 mm over a consecutive 5 day period.

NB TSS (total suspended solids) - under EPL, a TSS water quality limit of 50mg/litre pertains. Exceedance of this limit is permitted when discharge occurs solely as a result of rainfall measured at the premises. For discharge to be considered to occur solely as a result of rainfall, the rainfall must exceed a 5 day rainfall depth value of 90 mm over a consecutive 5 day period.

2025 PKCT Sedimentation Pond Overflows - EPL 1625

Ponds location/names: TS1 pond: DP22, Central Pond: DP23, Tower 3 pond: DP24, South Pond: DP25, Workshop Pond DP26, Berth 102 DP27.

Sample Location	Sample Date	Date Results Obtained	Date Results Published	pH (pH units) Criteria: Monitoring only	Total Suspended Solids (milligrams per litre) Criteria: Monitoring only	Oil/ Grease (milligrams per litre) Criteria: Monitoring only	Commentary on Results
No overflows from any satellite ponds in January 2025							
No overflows from any satellite ponds in February 2025							
No overflows from any satellite ponds in March 2025							
No overflows from any satellite ponds in Apr 2025							
No overflows from any satellite ponds in May 2025							
No overflows from any satellite ponds in June 2025							
No overflows from any satellite ponds in July 2025							
DP22 - TS1 Pond	21/8/2025	27/8/2024	23/09/2025	7.4	83	not visible	Overflow of TS1 Pond occurred after a heavy rain period (114.6mm) in a 5 day period leading up to the overflow. Pond sediment levels were below the required 20% and no pump failures occurred. Pond and pump capacity could not keep up with the inflows. Discharge is permitted under PKCT's licence conditions.
DP22 - TS1 Pond	10/9/2025	18/9/2025	23/10/2026	7.4	111	not visible	Overflow of TS1 Pond occurred after a heavy rain period (126.6mm) in a 48 hour period leading up to the overflow. Pond sediment levels were below the required 20% and no pump failures occurred. Pond and pump capacity could not keep up with the inflows. Discharge is permitted under PKCT's licence conditions.
DP23 - Central Pond	10/9/2025	18/9/2025	23/10/2027	6.48	210	not visible	Overflow of Central Pond occurred after a heavy rain period (126.6mm) in a 48 hour period leading up to the overflow. Pond sediment levels were below the required 20% and no pump failures occurred. Pond and pump capacity could not keep up with the inflows. Discharge is permitted under PKCT's licence conditions.
