ENVIRONMENT POLICY

Port Kembla Coal Terminal is committed to preventing pollution by operating in an environmentally responsible manner, sensitive to community and customer needs and expectations.

In support of this commitment, we at all levels, undertake to do the following:

- Understand, control and influence where able the impacts of our operation on environment and community throughout the life-cycle of our product.
- To achieve the highest possible standard of dust control recognising the impact dust emissions have on the environment and our neighbours.
- To be proactive and continually improve our environmental performance through our environmental management system.
- To provide and promote the efficient use of energy, water and other resources, minimising waste and facilitating recycling and reuse where practically possible.
- To have a positive relationship with the community and stakeholders understanding and taking into account their needs, concerns and expectations.
- To comply with or exceed, the conditions set out in our Environmental Protection Licence 1625, our Project Approval 08_0009, all applicable legislation, applicable standards and codes of practice and other requirements.
- To provide adequate resources for the implementation of this policy.
- To document and communicate policy, objectives and targets to our people and obtain their involvement in the development and implementation of improvement actions.
- To communicate our policy, objectives and achievements to the community through our web site and community consultative committee.
